

WHAT YOU NEED TO DO NOW

1. Determine where on your property line you want your sewer lateral placed. A sewer contractor or excavator or possibly a plumber could advise. See the contractor list on the website. This list shows contractors registered with the Town as of this year.
2. Get a copy to the town by June 25, 2021. Details are available on the website. Drawing must show your preferred location with a dimension to a permanent object (ie. telephone pole, large tree, or other structure) and needs to be indicated on a: Google Earth Screenshot, Beacon Picture, Property Survey, or Plat. You may draw the location on one of these types of drawings, with the distances shown, and submit a digital picture. This location should be at a point nearest to your property line
3. Determine if you have any landscaping/hardscaping in the Town right-of-way that you want to remove so the lateral stub can reach your property line. The Project Contractor will only remove/replace standard materials.
4. Submit questions to the email address: lakeshoredrivesewerproject@gmail.com
5. Attend the Zoom Q & A session on May 29, 2021 at 10:00 am CDT. The Zoom credentials will be available on the Town website: townoflongbeachin.org.
